Canadian Intellectual Property Office

Canada

Trade-marks Journal
Vol. 63 No. 3196

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

GOODS

Computer hardware; integrated circuits; system-on-chip integrated circuits; microprocessors; processors [central processing units]; chips [integrated circuits]; application specific integrated circuits; graphics processing units namely integrated circuit components for graphics; semiconductor intellectual property cores; instruction set architectures; RISC-based instruction set architectures; microcontrollers; electronic chips for the manufacture of integrated circuits; interfaces for computers namely computer interface boards, computer interface cards, bus interfaces [integrated circuits]; printed circuit boards; electronic circuit boards; telephones; mobile computing devices, namely portable computers, laptop computers, notebook computers, subnotebook computers, ultra-mobile computers, tablet computers, Internet tablet computers, personal portable computers, personal digital assistants, personal digital assistants with integrated mobile telephone functionality, mobile telephones, smart phones, handheld computers, handheld game consoles, Global Positioning System (GPS) consisting of computers, computer software, transmitters, receivers and network interface devices, navigation apparatus for vehicles in the form of on-board computers and personal media players; computer servers; motion sensors, optical sensors, proximity sensors, timing sensors, thermal sensors, acceleration sensors, temperature sensors, pressure sensors and pollutant sensors; smart devices, namely smart cards, smart card readers, smart meters, smart remote controllers, smart wrist bands, smart watch phones and smart pens; wearable computers; set top boxes; modems; video encoders and transcoders; electronic book readers; computer data terminals; apparatus for wireless communications namely radio transmitters and receivers for telecommunication; televisions; smart televisions; horizontal surface computers; mp3 players; mp4 players; electronic security devices namely security scanners, security sensors, personal security alarms, security and fire alarms; electronic smart lighting devices namely electric control systems for lighting systems, lighting control panels; electronic energy monitoring devices namely home temperature monitors and control panels; computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of integrated circuits, microprocessors, microprocessor cores, semiconductor intellectual property cores, macro cells, microcontrollers, bus interfaces and printed circuit boards; computer software used in, and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of application software and operating system software to run on integrated circuit based devices; microprocessor design file software; computer operating programs; security software;

electronic publications (downloadable or streamable) all relating to instruction set architectures, RISC-based instruction set architectures, electronic data processing equipment, microprocessors, computer hardware, computer software, integrated circuit based devices and electronic devices that send and receive data in a connected network; Printed publications all relating to electronic data processing equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures, processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices and electronic devices that send and receive data in a connected network; instruction manuals relating to design and development of electronic data processing equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures, processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, electronic devices that send and receive data in a connected network, macro cells, microcontrollers, bus interfaces and printed circuit boards; user and development manuals all relating to the design and development of electronic data processing equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures, processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, electronic devices that send and receive data in a connected network, microprocessor cores, macro cells, microcontrollers, bus interfaces and printed circuit boards; printed publications concerning the performance and technical characteristics of electronic data processing equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures, processor-based devices, integrated circuits, computer hardware, computer software, integrated circuit based devices, electronic devices that send and receive data in a connected network, microprocessor cores, macro cells, microcontrollers, bus interfaces and printed circuit boards.

SERVICES

Design and creation of intellectual property and related rights; research, development, design, technical consultancy and technical support services, all relating to electronic data processing equipment, microprocessors, system-on-chip devices, processors [central processing units], chips [integrated circuits], application specific integrated circuits, graphics processing units, semiconductor intellectual property cores, instruction set architectures, RISC-based instruction set architectures, processor-based devices, integrated circuits, computer hardware, computer software , integrated circuit based devices, electronic devices that send and receive data in a connected network, microprocessor cores, macro cells, microcontrollers, bus interfaces and printed circuit boards; research, development, design, technical consultancy and technical support services, all relating to computer software; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of integrated circuits, microprocessors, microprocessor cores and semiconductor intellectual property cores; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling , de-bugging, verification, construction and interfacing of macro cells, system-on-chip devices, micro-controllers, bus interfaces and printed circuit boards; research, development, design, technical consultancy and technical support services, all relating to computer software used in and for use in the design, development, modelling, simulation, compiling, de-bugging, verification, construction and interfacing of application software and operating system software to run on integrated circuit based devices; research, development, design, technical consultancy and technical support services, all relating to computer software used in servers, operating system software, web services software, and security and cryptographic software.

Colour Claim

Colour is claimed as a feature of the trade-mark. The Applicant claims the colours 'light green', ' dark green', 'yellow' and 'white' as essential features of the trade-mark. Commencing above the number '9', the outer partial ring design is 'light green'. The peg-like shapes protruding from the outer ring design are 'light green'. The inner circle design is 'dark green', with a 'white' highlight in the upper left portion of the circle. The tear-drop shaped design located within the circle design is ' dark green', gradually fading upward to 'light green', then to 'yellow'. The curved line segment to the right of and beneath the tear-drop shaped design is 'yellow', gradually darkening upward to 'light green'. The numbers, 9, 12, 3, and 6 are 'dark green'.
